

We will rise

Lockdown has arrived for all
23rd of March
Our world flipped on its axis

We watched it spread globally
Coronavirus
Scary unseen enemy

Unprecedented challenge
We are but human
How can we get through these times?

At home there is loss, heartache
Each death hits us hard
People in isolation

In work we must stand up tall
Face the challenges
To do our best as always

Keyworkers doing their best
Weary but hopeful
Just believing we will win

Communities together
Show love and kindness
We are in this together

Our brighter days will return
Inner peace restored
Appreciate little things

Stay strong and we will triumph
Pull each other through
We are fighters, we will rise
